Low pressure

AND MRS. LEMON GELO-SMITH

A nice lady touring historic chicago

Would

- User her chemistry degree for independent study of vinyl transfers, and gum removal

Would not

- Fall in with a group of historical reenactors

This nice lady does

She does not like the health spa, and prefers chemical debriding

- Not so many illegal things, like plumbing on her own property

Mrs. Lemon Gelo-Smith

Would like for her twin, Orange Gelo to calm her down and so she left Chicago

Things the Mrs learn'ed

Chrisitian science and the church of letter day saints is there to prevent the bias against naturalized citizens living in theusa by providing areas of conventions for marriages, and makers spaces alike

“Quick guide”

THIS SUMMARIES REQUESTE VOUR “DIPLOMA OF HIGHER EDUCATION” AND “BIRTH CERTIFICATE”

While interested in hydroelectric sciences as a learning tool, lost her freelance contracts by becoming faece-blined after touring a flooded mine, site of volcanic activity in lower Chicago
